

Vision

Saskatchewan Academic Health Sciences Network (SAHSN) enables the effective interface of the health services system and the post-secondary system so that health science graduates meet the current and emerging needs of the health system to achieve the best possible health outcomes for the people of Saskatchewan.

Mission

To stimulate and empower effective inter-system planning, direction and accountability so that the post-secondary educational system meets the current and emerging needs of the health services system and that the health services system provides the necessary supports for the academic mission of post-secondary institutions with respect to both the education of future health workers and the generation of new knowledge.
